**SCIENTIFIC COMMITTEE**

Doctors : **Pr Michel Prudhomme, Dr Laurent Mineur, Pr Stéphane Droupy**

Stomathematician: **Ms Martine Pagès**

Patient Organisation : **Ms Nicole Risbec, Ms Nicole Berardo**

Ladies and Gentlemen,

The commitment of the Provence Stomie Contact Association reflects the strong demand of patients to participate in the development of actions that concern them and to better understand them. Their commitment must make it possible to adjust health actions and make them more relevant, closer to their concerns.

This 1<sup>st</sup> Inter-Regional Nursing Congress in Avignon, on 3<sup>rd</sup> and 4<sup>th</sup> May 2019, is a step desired by the association which aims to bring together all the actors involved in all the stages of the Patient Care Pathway in a spirit of dialogue, exchange and consultation. It is a first step towards creating space to stimulate research, transform certain care processes and improve their qualities.

A poster session will be opened in order to highlight the medical and paramedical teams engaged in research around patients with a digestive or urinary stoma (quality of life, equipment, therapeutic education, technique for treating complications linked to the stoma, etc.). This component will also encourage exchanges between researchers, nurses and patients. After deliberation within the scientific committee, represented by patients, doctors and stoma therapists, a prize will be awarded to the best poster.

Hope you are among us to share knowledge through this new space of health democracy.

Best regards,

**Dr Laurent Mineur,**

President of Provence Stomie Contact Association

**Friday 3<sup>rd</sup> May 2019**

**12h00 - 14h00** General Assembly of the Ostomy Patients Association of the Grand South (ASGS)
